Re: LightSquared Subsidiary, LLC Ex Parte Communication. IB Docket No. 11-109 IBSF File No. SAT-MOD-20101118-00239

Dear Marlene,

It has come to my attention that according to recent test results that the implementation of the plan by LightSquared will interfere with high precision GPS systems. I <a href="mailto:oppose">oppose</a> LightSquared's request (which ignores the recent independent test results) to affirm its license and its request to go forward with its plan.

The use of the high precision GPS system has become commonplace in our Land Surveying industry. If this system were to stop working the results would be very costly to many. Not only would it be costly to Land Surveyors, but it would also be costly to those that use the product high precision GPS.

PLEASE do not allow LightSquared to proceed with its plan until they can prove that it will not affect a GPS system that has become so widely used.

Thank you for your time, Doug Spreen
